

I must urge the FCC to keep the current NJ Do Not Call law in place as I consider these unsolicited calls a very big nuisance, harrassing and an invasion of my personal liberties and right not to be solicited. I was getting between 10 to 15 calls per day until I registered. I further urge the FCC to take a real leadership role in making these calls illegal all over the country and stopped for good. I know of not one person that wishes to receive these calls.
